* * * * *

Any publication or article listed in this bulletin may be borrowed free of charge from the Bureau of Information of the National Society for Crippled Children. Bibliographies listing similar articles, or loan package libraries containing additional literature on any of the subjects discussed in these articles, will be sent to any interested person upon request.

Articles appearing in the bimonthly magazine, THE CRIPPLED CHILD, or in the bimonthly news letter of the Society, THE CRIPPLED CHILD BULLETIN, are not listed in this bulletin.

A list of periodicals in which articles listed in this issue originally appeared, together with their addresses and prices, is given on Page 6.

Bulletin on Current Literature

Prepared by Lillian Dowdell, Librarian

Issued monthly to affiliated state and local societies for crippled children, state agencies engaged in the treatment, education or vocational rehabilitation of cripples, and public or private institutions and agencies having Institutional Membership in the National Society for Crippled Children. Available also to other individuals and agencies who pay 50¢ a year to cover actual costs of materials and postage.

225. Annual Report, 1943 - National Foundation for Infantile Paralysis. National Foundation for Infantile Paralysis, 120 Broadway, New York, N.Y. 1944. 62 pp.
226. Backus, Ollie L., Ph.D. and Dunn, Harriet M., M.A. Experiments in the Synthesis of Clinical Methods into a Program of Rehabilitation. The Journal of Speech Disorders, Mar., 1944. 9:1:1-17.

The authors, directing speech clinic work at the University of Michigan and the University of Pittsburgh, respectively, report on the operation and accomplishments of special summer classes for speech defective children held in Pittsburgh in 1942 and in Ann Arbor in 1943. The classes included cleft palate and cerebral palsy cases.

227. Baruch Committee on Physical Medicine. Archives of Physical Therapy, Apr., 1944. 25:4:199-201.

Announces the formation of a board with Dr. Ray Lyman Wilbur as Chairman, and Dr. Frank H. Krusen as Director, to administer a gift of \$1,100,000 from Bernard M. Baruch for a program of research and professional education in physical medicine.

228. Bomfim, Dr. Renato Da Costa. Medical Social Service for Crippled and Defective Children. The author, Sanatorio Esperanca, São Paulo, Brazil. 1944. 14 pp.

The author, a Brazilian Army Lieutenant now making a study for his government of American institutions and agencies for the crippled, outlines the present provisions for crippled children in his state of São Paulo, Brazil. He presents statistics on the 8,694 cases registered in the only orthopedic clinic in his state of 1,500,000 people, and compares these with the statistics of the 15,731 cases found in a survey of New York City. He calls attention to the need for more hospital facilities [a need soon to be met by another hospital orthopedic clinic and a hospital for poliomyelitis]; social service workers in the present clinic; convalescent institutions for long-time cases which now occupy badly needed hospital beds; and a complete program of special education for crippled children in schools, hospitals, and homes. The need for "the propaganda of the advantages of early treatment" is pointed out, and the suggestion made that public school teachers be trained to do this.

229. Campbell, John. Rehabilitation of Injured Workmen in Ontario. Public Affairs, Winter, 1944. 7:2:83-87.

Calling attention to Canada's lack of, and need for, a continuous, coordinated national rehabilitation program, the Rehabilitation Officer of the Ontario Workmen's Compensation Board describes that Board's 19-year-old program of physical and vocational rehabilitation.

"During the years 1941 and 1942, 247,000 industrial accidents were reported to the Board. While several thousand resulted in permanent disability, only 681 were considered to be so badly handicapped that they could not possibly return to their old job."

"During this two-year period, 592 of the seriously permanently disabled cases were closed as 'rehabilitated'. Of these, only 56% were re-employed by their own firms, while 44% were placed elsewhere. ...only 65 of the seriously handicapped cases were closed as 'not rehabilitated'."

230. Compilation of State Reports, 1942-1943. National Rehabilitation News, Apr., 1944. 10:3:24-28.

Statistics, by state, on rehabilitation workers, rehabilitation and non-rehabilitation case closures, and status of cases on "live roles."

"The 42,615 cases rehabilitated in 1943 represent an increase of 96 per cent over those of 1942 and 192 per cent over those of 1941. It is interesting to note that the number of non-rehabilitation closures decreased during the last fiscal year from 2,739 to 2,380 which represents only about five per cent of the number of cases rehabilitated. During the past two years the professional personnel employed by the States has increased from 361 to 475. This expansion of approximately 33 per cent in personnel has been accomplished with nearly 200 per cent increase in rehabilitations."

231. Coss, Warren D. They Also Serve. Courage, 1944. 5:1:22-23, 66.

Stories of poliomyelitis victims now employed in war industries.

232. Cusack, Peter J. A. Legion of Courage. Courage, 1944. 5:1:20-21, 70-71.

Stories of World War II heroes who have been poliomyelitis cripples earlier in life.

233. Davis, Alfred L. Evaluation in Rehabilitation Program. National Rehabilitation News, Apr., 1944. 10:3:34-35.

Suggests devices which rehabilitation case work supervisors can use in evaluating the effectiveness of their workers.

234. The Employment of Disabled War Veterans and Other Disabled Persons. Association of Casualty and Surety Executives, 60 John Street, New York 7, N.Y. 4 pg. folder. Feb. 8, 1944.

This "Declaration of Attitude," as it is sub-titled, says "It is the policy and practice of the member companies of this Association not to advise employers against the employment of disabled persons." In discussing the problems of employers who fear to hire an already handicapped employee because of the possible danger of a subsequent injury resulting in permanent total disability, the Declaration opposes the practice of securing waivers of their compensation rights from the prospective employee, and recommends the establishment in each state of a Second Injury Fund to bear the excess cost of compensation for such permanent total disability after compensation has been paid by the employer for the second injury only.

235. England, Robert. Canada and the Discharged Service Man. Public Affairs, Winter, 1944. 7:2:108-112.

236. Farnam, Mary. A Comprehensive School Health Plan. Hygeia, May, 1944. 22:5:340-341, 398-399.

"The Pittsburgh public school system has a School Health Service which is far reaching in its contacts and outstanding in its results. This health program presents three major aspects: health instruction, physical education and recreation, and health service."

237. Feike, R. W. Adapting Training Facilities to Meet Rehabilitation Needs. National Rehabilitation News, Apr., 1944. 10:3:10-12, 29-30. [more]

Advocates the use of job analysis in adaptation of training facilities to needs of rehabilitation clients.

238. Filter, Dr. R. O. Hospitalization--When and How Long. National Rehabilitation News, Apr., 1944. 10:3:7-9.

Calls attention to the scarcity and inadequacy of statistical information on the average length of hospitalization for treatment of specific disabilities; and shows rehabilitation worker's need for such information.

239. Fishbein, Morris. Rheumatic Fever. Hygeia, May, 1944. 22:5:333.

"One of the greatest needs of America today is adequate institutional space for the children with rheumatic fever."

240. Forty-fourth Annual Report of the Association for the Aid of Crippled Children - January 1, 1943 -- December 31, 1943. The Association, Room 700 - 580 Fifth Avenue, New York 19, N. Y. 20 pp.

241. Fuss, Felicia. Rehabilitation of the Disabled Serviceman: A Selected Bibliography. Bulletin of the Russell Sage Foundation Library, No. 161, Mar., 1944. The Foundation, 130 East 22d St., New York 10, N.Y. 8 pp. 10¢.

242. Gardner, Julian G., A.B. The Importance of Recreation for Crippled Children: address presented May 8, 1944 to Women's Auxiliary of Toledo Society for Crippled Children. Ohio Society for Crippled Children, 40 West Gay St., Columbus 15, Ohio. Mimeographed. 5 pp.

Emphasizing that "The more the crippled child comes in contact with normal children, the better his chances are for assuming his share of the community responsibility later when he reaches adulthood," Mr. Gardner discusses recreation on the playground, in the church and Sunday school group, in scouting, and in camping.

243. Gardner, Warren H., Ph.D. Writing for the Left-Handed. National Rehabilitation News, Apr., 1944. 10:3:5-6, 32.

244. General Bibliography on Orthopedics and Care of Handicapped. Joint Orthopedic Nursing Advisory Service, 1790 Broadway, New York 19, N.Y. May, 1944. Mimeographed. 9 pp.

245. Grueninger, Walter F. Entertaining Sick Soldiers. The Survey, Apr., 1944. 80: 4:125-217.

Relates the success of ward entertainment provided at Camp Shanks by volunteer artists from nearby New York City. Much space is devoted to a listing of the artists and acts which have been most popular, and especially to the favorite music of the soldiers. The psychological values of different types of music are mentioned.

246. Gudakunst, Don W., M.D. Facing the Future in the Fight Against Infantile Paralysis. The Journal of Health and Physical Education, May, 1944. 15:5:258,293-294.

Calls attention to need for more physical therapists.

247. Gudakunst, Don W., M.D. Today's Attack on Infantile Paralysis. Education for Victory, May 3, 1944. 2:21:1, 3-4.

248. Heinz, Dorothy C. V., M.D. When the War is Over. Public Welfare in Indiana, May, 1944. 54:5:3-4.

A psychiatrist reviews the employment problems which will face civilian and war cripples after the war. She shows the place of the psychiatrist in meeting the emotional needs of the disabled.

249. Hines, Gen. Frank J. The Vocational Rehabilitation Training Program of the Veterans Administration. National Rehabilitation News, Apr., 1944. 10:3:21-22, 33.
250. Jamieson, Florence. Physiotherapy in Reconstruction. National Rehabilitation News, Apr., 1944. 10:3:13-14.
251. Kratz, John A. New Horizons in Rehabilitation. Federal Probation, Jan.-Mar., 1944. 8:1:34-36.

The Associate Director of the U. S. Office of Vocational Rehabilitation outlines the services now available through the federal-state rehabilitation program.

252. Lichtenauer, Mary M. Bread Upon the Waters. Michigan Vocational Outlook, June, 1944. 6:4:237-238.

Tells how Mrs. Margaret Nickerson Martin, homebound poet of Jackson, Michigan, helps other homebound people by selling their handwork.

253. Manual of Policies, Section on Requirements and Recommendations for Physical Restoration Services. U. S. Office of Vocational Rehabilitation, Washington, D. C. April 1, 1944. 26 pp.
254. Mason, Jayne Hutton. Help for the Handicapped. Junior League Magazine, May, 1944. Pg. 9.

Tells of the work of Junior League volunteer assistants at the Curative Workshop operated by the Bridgeport Chapter of the Connecticut Society for Crippled Children.

255. Model Village for Disabled Chinese Soldiers. Monthly Labor Review, Apr., 1944. 58:4:760.

Reports that a village opened Oct. 15, 1943, near Peipei, north of Chungking, has about 200 soldiers, and will probably have 1,000 men with their families, 5,000 persons in all, within three years. Agriculture is the main activity; handicraft second in importance.

256. Nursery Schools for Crippled Children. Institutional Bulletin No. 37, May, 1944. National Society for Crippled Children, Elyria, Ohio. Mimeographed. 15 pp. Free.

Pre-school education programs at the following institutions are described in this Bulletin: Buffalo Crippled Children's Guild, by Lois LeFever Young; Rainbow Hospital, South Euclid, Ohio, by Ruth Wince Johnson; Cottage School, Oakland, California, by Mildred Olin Reynolds; Spalding School, Chicago, Illinois, by Mary G. Bernstein; The Workshop, Bridgeport, Connecticut, by Eleanor P. Mann; and Kindergarten for Cerebral Palsy Children, Albany, New York, by Else Haeussermann. A 3-page bibliography is included.

257. O'Connor, Basil. The Story of the Kenny Method. Archives of Physical Therapy, Apr., 1944. 25:4:231-234.

258. Potter, Ellen C., M.D. In Future Plans Chronic Diseases Must Have a Place; New Jersey Starts. Hospitals, May, 1944. 18:5:33-36.
259. Rohret, Mrs. Cecilia. Summary of talk to Spastic Club of Iowa. Iowa Society for Crippled Children and the Disabled, 404 Plymouth Building, Des Moines 9, Iowa. Apr. 18, 1944. 3 pp. Mimeo.

A Medical Social Consultant from the Iowa State Services for Crippled Children tells of some of her experiences in helping mothers meet their problems of care and training of cerebral palsied children.

260. Rosenow, Edward C., M.D. Poliomyelitis - The Relation of Neurotropic Streptococci to Epidemic and Experimental Poliomyelitis and Poliomyelitis Virus, Diagnostic Serologic Tests and Serum Treatment. comprises Vol. A44 of The International Bulletin, 319 West 103rd St., New York 25, N.Y. 1944. 87 pp. \$2.75.
261. Saunders, Sarah C. Industry's Stake in Home Accidents. Domestic Commerce, Mar., 1944. 32:3:15.
262. de Seversky, Major Alexander P. "I Owe My Career to Losing a Leg." Ladies' Home Journal, May, 1944. 61:5:20-23, 164-169.

"...I owe my career in large measure to the loss of my right leg in the first World War. Most of what I have accomplished in the intervening years--as combat pilot, test pilot, airplane designer and manufacturer, inventor, writer and student of aerial warfare--I can trace back to that physical handicap."

"I mean, quite literally, that my bodily disability awakened powers and aptitudes within me which were dormant. It focused mental energies which otherwise would probably have been dissipated. It enforced invaluable habits of caution and studious interests that would have escaped me had my limbs been intact. And to be altogether candid, the disability won me that extra attention, admiration and unearned credit reserved for the physically handicapped which, over the decades, have added up to formidable advantage in life."

Pictures show Major Seversky ice skating, diving and dancing. Supplementing Seversky's story is a pictorial account of a pilot who lost a leg in World War II, showing his activities while convalescing at an AAF hospital.

263. Sherman, Mary S., M.D. The Natural Course of Poliomyelitis - A Report of 70 Cases. The Journal of the American Medical Association, May 13, 1944. 125:2:99-102.
264. Stone, Peter C. Men and Women of Good Will. Courage, 1944. 5:1:48.
- Report on activities of local chapters of National Foundation for Infantile Paralysis.
265. Teamwork in Venereal Disease Prevention - A Report of 1943 Activities to the Friends of the American Social Hygiene Association. Journal of Social Hygiene, Mar., 1944. 30:3:107-133.
266. Trommer, Philip R., M.D. and Cohen, Abraham, M.D. The Use of Neostigmine in the Treatment of Muscle Spasm in Rheumatoid Arthritis and Associated Conditions. The Journal of the American Medical Association, Apr. 29, 1944. 124:18:1237-1239.

267. Underwood, Walter B. "The Crippled Child--What Now?" Ohio Parent-Teacher, May, 1944. 22:9:11-12.

The executive secretary of the Ohio Society for Crippled Children "points with pardonable pride to the growth in Ohio of a program of physical care and education that has not only served our own children but has also served as a pattern for the program for other children in other states." He calls attention to the lack of facilities for the care of helpless [severely handicapped] crippled children, and tells how the Society is sponsoring state legislation to make provisions for these children.

268. Whitman, Royal, M.D. The Development of Orthopaedic Surgery - A Critical Estimate of the Influence of Three Pioneers - Lewis A. Sayre, Hugh Owen Thomas, and James Knight. The Journal of Bone and Joint Surgery, Apr., 1944. 26:2:408-410.
269. Wilson, May G., M.D. Hereditary Susceptibility in Rheumatic Fever - The Potential Rheumatic Family. The Journal of the American Medical Association, Apr. 22, 1944. 124:17:1188-1189.
270. Yost, Edna. How Shall We Face our Disabled Men? The Womans Press, May, 1944. 38:5:210-213.

"This article is a preview of some of the material to appear in a book for the physically handicapped, "New Worlds for the Handicapped," written by Miss Yost in collaboration with Dr. Lillian W. Gilbreth. It will be published by Macmillan this spring."

Examples of successful employment of the handicapped are quoted to convince the laymen that "the great majority of handicapped men will, if they try, be able to hold not just jobs but good jobs." The author points out that every woman participating in the rehabilitation of the disabled must be fully convinced of this if she is to meet the greatest need--"to stir all these men to early efforts on their own behalf."

Periodicals

[For others, see lists in previous 1944 issues]

- Courage, National Foundation for Infantile Paralysis, 120 Broadway, New York 5, N.Y.
- Domestic Commerce, Supt. of Documents, Government Printing Office, Washington 25, D.C.
